

New Rules and Regulations for the Trucking Industry

AgriNews

Truckers may want to make sure they've got a good pair of reading glasses.

Some new rules and regulations are headed for the U.S. trucking industry, dealing with everything from medical exams to proposed rulemaking that would impact truckers.

Sleep Apnea 'Pre-Rule' Open for Comment

Overdrive Magazine

On Thursday, March 10, the Department of Transportation (DOT) published its sleep apnea 'pre-rule' notice. The DOT is seeking feedback from the trucking industry, specifically owner-operators, about the prevalence of obstructive sleep apnea among truck drivers and the costs associated with treatment.

There is a list of 20 questions in the public notice that the agency would like answered. They touch on the problem of obstructive sleep apnea, the cost and benefits of treatment, screening procedures and diagnostics, medical personnel qualifications and restrictions and treatment effectiveness.

The comment period is open for the standard 90 days, which will be until June 8th.

Tomorrow's Trucker

Overdrive Magazine

After months of reporting, Overdrive editors have compiled enough information to offer a realistic take on what truck operators can expect from their livelihood in the coming decades. The first four parts of the series focus on autonomy, partnership and technology; advances in technology; autonomous trucking; and, wireless inspections.
